BAS CLARIN Repository

This repository contains all *BAS* resources that have been made accessible for academic users within the *CLARIN* infrastructure. The repository contains tools, speech corpora, recording sessions within speech corpora and other resources. The smallest unit described by metadata is the recording session; therefore the smallest searchable and downloadable resource part is a complete recording session with media and annotation files.
In general access to contents of this repository is free for European academic users; for some resources *special restrictions may apply*. Non-academic users may obtain a user license from BAS which grants an access code to selected resources of this repository (contact `bas@bas.uni-muenchen.de` for details).

CLARIN CENTRE B

HELPDESK

You are not yet authentified to have access to the BAS repository. *Login via the DFN-AAI* as an academic user.
If your academic institution is not part of the *DFN-AAI*, you can *register here to get a CLARIN account*.
(For security reasons your browser will show the start page of the BAS repository after login.)
